  - Charging case:
    - 365 mAh - 2x charges for earphones
    - Charging time: approximately 2 hours

#### CONNECTIVITY

- Wireless connectivity**  
Bluetooth 4.2  
AAC codecs
- Connections**  
1.25 m USB-A to micro USB cable for charging

#### YOU MIGHT WANNA KNOW

For greater connectivity and to avoid sound degrading as it passes through human tissue, Beoplay E8 uses NFMI (Near Field Magnetic Induction), an audio streaming technology that transmits sound from one earphone to the other using a magnetic field. This way, the master earphone can transmit sound to the slave earphone without loss of quality. NFMI technology is the digital wireless technology currently used in hearing instruments.

Whether you are on a phone call or simply want to listen to music, only the right earphone can be used as a stand-alone device.

Only 20 minutes of charging time gives you one hour of playtime.
